

Formatting the list of references

List of references starts on a separate page.

Title is References and is centered on the page.

References

Entries are formatted with a hanging indent.

A warm welcome to Glacier National Park. (1940, April 22)

Each source included in your in-text citations has an entry, except for personal communications.

List is double spaced, with no additional space between entries.

URLs are kept on one line if possible.

Hyperlinks are removed from the URLs.

List is alphabetized based on the first letter of each entry, ignoring *a*, *and*, and *the*.

A is ignored when alphabetizing, so *A warm* comes after *Vidraru*.
